Description:	<p>Characterize the solar corona at 2 frequency bands (X and Ka1 or X and S, depending on DSN antenna used for downlink), and assess the electron content and possible Faraday rotation, during the solar conjunction period.</p> <p>DSS-63 required for X- and S-band supports.</p> <p>If DSN coverage changes to an antenna that supports X- and Ka-band instead, then change Opmode to RSSK.</p>

 ITL Request:
 Special DSN Requirements: DSS-63 required to obtain X- and S-band downlink data.
 Special Requirements: This activity will need to start with the RSS S-band frequency Opmode (RSS2, SLOW an option). IO-RS Ops should be consulted, along with the integrated and approved activities TOL, before SASF generation.
 If DSN coverage changes to an antenna that supports X- and Ka-band instead, then change Opmode to RSSK.
